COMPANY PROFILE

Technology Marketing and Creative Services

Elevate Your Business.

NinthSky Technologies brings together technology, marketing, and creative services to help businesses manage their digital operations, strengthen their brands, and connect with customers.

From business websites and cloud solutions to campaign planning and design, we help clients turn their requirements into clearly defined projects and ongoing services.

Who We Are

We work with businesses that need practical technology solutions and a consistent presence across their customer channels. Our approach connects the systems that support daily operations with the messages and creative work that represent the business.

We begin by understanding your goals, current setup, and priorities. We then recommend a suitable scope, explain the costs, and agree on responsibilities before work begins.

Our Purpose

To make technology and marketing easier for businesses to manage through clear advice, coordinated delivery, and support suited to their needs.

Our Service Areas

Technology supports your operations. Marketing connects your business with its audience. Creative services give your brand a clear and consistent expression.

Our Services

Engage NinthSky for a specific requirement or a coordinated project across several service areas. Deliverables, subscriptions, production arrangements, and support are defined in your proposal.

Technology

Websites Hosting and Business Email

Business websites and landing pages; hosting configuration and management; professional email setup; website maintenance and agreed ongoing assistance. Online stores and custom functionality are scoped separately.

Cloud Solutions

Cloud productivity tools, storage, backup configuration, and migrations planned around users, applications, data, and operational requirements.

IT Support and Cybersecurity

Remote technical assistance, account access controls, multifactor authentication, and device protection. Specialist assessments and advanced security work are scoped individually, with appropriate expertise arranged for the project.

Marketing

Digital Presence and Campaigns

Social media planning and management, content scheduling, search engine optimisation, digital advertising, and performance reporting tied to agreed objectives.

Media Planning and Coordination

Campaign messaging and coordination across digital, print, radio, and other suitable channels. Media placements and production work are arranged through appropriate providers, with costs and approvals agreed before commitment.

Creative

Brand Identity and Design

Logo and identity development, brand guidelines, promotional graphics, company profiles, presentations, and print artwork for brochures, business cards, flyers, banners, and advertising.

Advertising Content

Copy and creative concepts for digital, print, and broadcast briefs, with specialist production coordinated where required.

Working With NinthSky

Our process gives each project a clear starting point, an agreed scope, and a practical handover. Ongoing services are defined separately so you understand what support includes.

Understand Your Requirements

We discuss your objectives, audience, existing tools, and priorities to identify the work needed.

Define the Scope

We prepare a proposal setting out deliverables, exclusions, fees, third-party costs, responsibilities, and the intended delivery schedule.

Deliver and Review

We carry out the agreed work, communicate progress, and request review and approval at the appropriate stages.

Handover and Support

We provide the agreed assets, access, and guidance. Where you select ongoing support, we document its hours, limits, and escalation arrangements.

Our Commitments

Clear Communication

Understandable proposals and straightforward explanations of costs and options.

Defined Responsibilities

An agreed scope and approval process, including the role of any specialist providers.

Careful Stewardship

Customer domains and accounts remain under customer ownership, with authorised access for management. Information and brand assets are handled with care.

Practical Recommendations

Solutions selected around your requirements, resources, and ability to maintain them.

Discuss Your Project

Tell us what you want to improve, build, or promote. We will help define the next step and prepare a proposal around your requirements.
